

 Drahim PFM x 

 **keeps the customer relationship. Drahim brings the PFM engine.**

# A transactional wallet wins moments. A financial companion wins habits.

Barq is already trusted when users need to pay, transfer, or receive money. The next opportunity is to give users a reason to return when they are not making a transaction.

## Event-led sessions

Users open the wallet to complete a payment or transfer, then leave.

## Limited financial context

Transactions are visible, but users do not yet have a simple view of where their money goes or how they are progressing.

## Few reasons to revisit

Without budgets, goals, or relevant updates, there are limited reasons to return between payment events.

# Every transaction can become a reason to return.

Today

With embedded PFM

Transaction complete

Spending category

Users understand where their money went.

Payment history

Progress update

Users see budgets or goals update.

Static balance

Relevant moment

Users receive useful messages.

Next payment event

Return trigger

Users return to Barq again.

 Drahim PFM x barq

# Drahim PFM The Intelligence Layer

# Drahim PFM: the intelligence layer

Financial context, savings guidance,  
and richer engagement built for  
white-label embedding.

## Core capabilities

-  Account aggregation
-  Auto-categorization
-  Cash-flow visibility

## What users get

-  Budgets & goals
-  Smart insights
-  Savings nudges

## barq today: strong wallet experience.

A trusted transactional app with room to deepen daily engagement.

### Barq strengths

Fast payments & transfers

Trusted wallet experience

Strong user activity base

### Opportunity to improve

Mostly transactional sessions

Limited financial context

Few reasons to return between payments

# PFM, embedded inside Barq.

Barq keeps the app experience. Drahim powers the financial intelligence underneath.

## Barq stays front and center

 Barq brand and navigation stay intact

 Users remain inside the Barq app

 Seamless, native customer experience

## Drahim powers the PFM layer

 Account aggregation and transaction categorization

 Spending visibility, budgets, and savings goals

 Smart financial insights that create reasons to return

# See it. Understand it. Act on it. Come back.

Drahim turns everyday Barq activity into useful financial moments helping users understand their money, take action, and return with a reason.

## Build the **relationship layer** without building the **entire stack**.

### Build internally

- ✗ Multiple quarters before usable PFM proposition
- ✗ Dedicated product, engineering, data, QA and governance effort
- ✗ Ongoing model and feature maintenance
- ✗ Value proven only after major investment

### Embed Drahim

- ✓ Illustrative 8-week path to controlled launch
- ✓ Existing PFM capability
- ✓ Barq owns the wallet experience
- ✓ Pilot first, then scale with evidence

# Start focused Prove value quickly Scale **with evidence**

A focused pilot helps Barq validate demand, measure engagement, and decide on wider rollout with confidence.

## 1.0M

Illustrative monthly active users

## 50,000

Illustrative pilot users

## +10–15%

Target uplift in monthly sessions

### What we will measure

PFM  
activation

Repeat  
sessions

Budget /  
goal creation

Retention  
signal

### Pilot timeline

**Day 0**  
Launch

**Day 30**  
Early review

**Day 60**  
Scale decision

# Pricing that scales

Barq pays once to launch, then pays in line with active PFM usage.

Illustrative commercial proposal
