PROFESSIONAL SUMMARY

Innovative Business Analyst and Healthcare Technology Professional with a unique blend of clinical expertise, technical skills, and creative problem-solving. Experienced in digital health transformation, AI integration, and population health analytics aligned with Saudi Vision 2030. Proven track record of leading cross-functional teams, developing AI-powered solutions, and creating impactful health awareness initiatives. Combines UI/UX design sensibility with business analysis capabilities to deliver user-centered digital solutions. Passionate about leveraging technology to improve healthcare outcomes and accessibility.

PROFESSIONAL EXPERIENCE

Business Analyst - Lean Business Services 	09/2025 – Present Riyadh, Saudi Arabia
• Authored 15+ BRDs and FRDs for Yamamah-related products, translating clinical, commercial, operational, and user needs into traceable requirements, user stories, acceptance criteria, business rules, and delivery-ready workflows. • Coordinate requirements alignment across architecture, data, web, mobile, clinical, and business teams through stakeholder workshops, backlog refinement, sprint planning, product walkthroughs, and UAT support. • Business Analyst for Yamamah Life Sciences, defining end-to-end product scope, commercial and medical user journeys, role-based access, approval flows, reporting needs, UI/UX specifications, business rules, acceptance criteria, and Jira/EPR delivery tickets. • Defined Yamamah AI Assistant requirements, including AI use cases, conversational workflows, LLM evaluation criteria, user inputs and outputs, permissions, guardrails, reporting logic, and validation considerations. • Designed KPI frameworks, dashboards, executive reporting experiences, and smart geographic-reporting flows that make complex healthcare and commercial information clearer and more decision-ready. • Defined care-coordination workflows that translate population-health insights into cohort pathways, care-gap logic, task assignment, patient engagement, activity monitoring, coordinator workflows, and governance requirements. • Contributed clinical and product expertise to national sleep-health strategy, service mapping, health-facility analysis, and population-health observatory workstreams.	
Business Process & Mining Consultant (Trainee) - Lusinova , <i>Lusinova</i> 	10/2025 – 01/2026 Riyadh, Saudi Arabia
• Analysed current-state process execution against target-state models to identify compliance gaps, process deviations, bottlenecks, and improvement opportunities. • Applied process discovery, conformance checking, 5 Whys, and Fishbone analysis to translate operational findings into structured improvement recommendations. • Defined process-performance measures across quality, speed, cost, compliance, and innovation in collaboration with process owners.	
Sleep Disorders Specialist - King Khalid University Hospital	11/2024 – 09/2025 Riyadh, Saudi Arabia
• Managed complex sleep-disorder workflows across polysomnography, home sleep testing, MSLT planning, PAP titration, clinical consultation, and patient reporting. • Created Sleep Report AI, a digital-health product concept that transforms technical polysomnography outputs into patient-friendly summaries, reducing report-preparation time from approximately 45 minutes to under 2 minutes. • Led “Between Dream & Wakefulness,” a public-health sleep-awareness experience combining exhibition design, workshops, patient education, and stakeholder engagement. • Rebranded and digitised the Polysomnography Course and Workshop curriculum, modernising learning materials for healthcare professionals.	
iOS Developer (Trainee) - Apple Developer Academy (Tuwaiq)	09/2024 – 06/2025 Riyadh, Saudi Arabia
• Develop iOS applications using Swift and SwiftUI, focusing on performance optimization. • Design advanced user interfaces with attention to overall user experience. • Collaborated with cross-functional teams to design, develop, and deliver full-cycle iOS applications, utilizing Challenge Based Learning (CBL) methodology to identify, develop, and evaluate innovative solutions. • Participated in product development from concept to completion, including ideation, market analysis, design, and development, with mentorship from industry professionals and Apple experts. Presented projects to senior Apple mentors and developers, receiving feedback and guidance throughout the process. • Completed the Second Year Program (3 months intensive, starting Oct 2025) in addition to the foundational program.	
EDUCATION	
Software Engineering Fellow (SEIP) , <i>Holberton School - (Tuwaiq)</i>	08/2025 – 06/2026 Riyadh, Saudi Arabia
Awarded a full scholarship for a one-year intensive software engineering program, completing projects from systems programming in C to full-stack applications using Python, SQL, JavaScript, and RESTful APIs. Collaborated on team projects with Git, code reviews, and agile methodologies, while developing a capstone project in Node.js, TypeScript, and Docker. Strengthened problem-solving, debugging, and project management skills through industry-simulated workflows.	
Bachelor of Applied Science , <i>Almaarefa University</i>	2023 Riyadh, Saudi Arabia
Academic Achievements: • First place in the Best Research Proposal - Scientific Research Day 2018	

- Participant in the Autumn Research Camp 2022

PROJECTS

Sleep Report AI – Healthcare Automation Tool 	07/2025
• Sleep Report AI is a web-based tool that helps sleep centers turn long, technical sleep study reports from G3 and other platforms into clean, accurate 2-page summaries in seconds.	
YAMAMAH AI ASSISTANT & SMART GEOGRAPHIC REPORTING Business Analyst 2026, <i>Business Analyst 2026</i>	2025 – Present
• Defined an AI-assisted analytics experience combining conversational support, smart visualisation, geographic reporting, role-aware access, user flows, business rules, and product-validation criteria. • Evaluated multiple LLM APIs through an AI proof of concept and converted findings into MVP scope, functional requirements, UX requirements, guardrails, and delivery inputs.	
YAMAMAH LIFE SCIENCES PLATFORM, Business Analyst & UI/UX Designer	2026 – Present
• Defined Release 1 product scope for a governed healthcare and pharmaceutical analytics platform supporting commercial and medical decision-making through population-health and medication insights. • Created persona workflows, role-based access, request journeys, reporting requirements, business rules, acceptance criteria, UI/UX specifications and design,BRDs, FRDs, and Jira/EPR delivery tickets.	
MURJAN — RED SEA CORAL MONITORING PLATFORM, Business Analyst & UI/UX Designer	2026 – Present
• Defined product workflows, geospatial dashboard logic, virtual-node monitoring, coral-bleaching alerts, role-based access, node-management flows, and UX/UI requirements for a web-based environmental-monitoring MVP. • Translated NOAA Coral Reef Watch data, sea-surface temperature, thermal stress, and bleaching-risk signals into understandable dashboard views, alerts, and actions for administrators, operators, and researchers.	
Riyadh Season Sponsorship Performance Report — Thamanyah	2026
• Analysed sponsorship performance across social media, live content, podcasts, campaign activity, audience engagement, and Roshn Saudi League coverage. • Designed an Arabic-first KPI dashboard and executive performance report, turning multi-channel data into clear insights, delivery-risk flags, and strategic recommendations. • Identified content, channel, and audience-performance patterns to support sponsorship optimisation, reporting clarity, and future-season planning.
